

Patent Docket P3230R1C47

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of: Dan L. Eaton et al. Serial No.: 10/063,567 Filed: May 2, 2002 For: <i>Secreted and Transmembrane Polypeptides and Nucleic Acids Encoding the Same</i>	Group Art Unit: 1647 Examiner: Rachel B. Kapust Confirmation No.: 9763 Customer No.: 09157
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------

DECLARATION OF WILLIAM I. WOOD, PH.D. UNDER 37 C.F.R. § 1.131

Sir:

I, William I. Wood, Ph.D. declare and say as follows:

1. I am Director and Staff Scientist in the Department of Bioinformatics at Genentech, Inc., South San Francisco, CA 94080.
2. I am one of the inventors of the above captioned patent application.
3. I am aware that some of the claims in the above captioned patent application have been rejected as being anticipated by U.S. Patent No. 6,468,546 (filed on September 24, 1999), Chen (U.S. Patent Application Publication 2002/0168762, filed July 26, 2001), Ople et al. (U.S. Patent Application Publication 2002/0051990, filed June 11, 2001) and Fox et al. (U.S. Patent Application Publication 2002/0165347, filed June 29, 2001).

4. I, along with other inventors of the above captioned patent application, conceived of and reduced to practice the nucleic acid and polypeptide sequences shown in the present specification as SEQ ID NOS:59 and 60, respectively, in the United States prior to September 24, 1999. The polypeptide of present SEQ ID NO:60 is also called "PRO1291".

5. With specific regard to the conclusion set forth in paragraph 4 above, enclosed herewith and labeled as "Exhibit 1 in Support of the Declaration of William I. Wood, Ph.D. under 37 C.F.R. § 1.131" is a copy of PCT patent application publication no. WO 99/63088 that was filed with the PCT on June 2, 1999. The enclosed PCT publication was filed on behalf of Genentech, Inc. and I am a named inventor thereon. I note that the nucleic acid and polypeptide sequences shown in Figures 207 and 208 of the enclosed PCT patent application correspond exactly to the nucleic acid and polypeptide sequences shown in the present above captioned patent application as SEQ ID NOS:59 and 60, respectively. As such, the enclosed "Exhibit 1 in Support of the Declaration of William I. Wood, Ph.D. under 37 C.F.R. § 1.131" makes clear that I and my associated co-inventors conceived of and reduced to practice the nucleic acid and polypeptide sequences shown in the present specification as SEQ ID NOS:59 and 60, respectively, in the United States prior to September 24, 1999.

6. Moreover, the enclosed "Exhibit 1 in Support of the Declaration of William I. Wood, Ph.D. under 37 C.F.R. § 1.131" also demonstrates that I and my associated co-inventors conceived of a mature form of the polypeptide shown in the present application as SEQ ID NO:60 (i.e., amino acids 29-282 of SEQ ID NO:60) prior to September 24, 1999. Specifically, one is directed to the enclosed PCT publication at, for example, page 189, lines 24-30 and page 190, lines 5-27, which demonstrate that we had conceived of polypeptides comprising SEQ ID NO:60 and polypeptides comprising the mature form of SEQ ID NO:60 prior to September 24, 1999.

7. Moreover, the enclosed "Exhibit 1 in Support of the Declaration of William I. Wood, Ph.D. under 37 C.F.R. § 1.131" also demonstrates that I and my associated co-inventors conceived of soluble, extracellular domain forms of the polypeptide shown in the present application as SEQ ID NO:60 prior to September 24, 1999. More specifically, one is directed to the enclosed PCT publication at, for example, page 189, lines 24-30 and the claims presented therein, which demonstrate that we had conceived of soluble, extracellular domain forms of the polypeptide shown herein as SEQ ID NO:60 prior to September 24, 1999.

8. Moreover, the enclosed "Exhibit 1 in Support of the Declaration of William I. Wood, Ph.D. under 37 C.F.R. § 1.131" also demonstrates that I and my associated co-inventors had deposited with the ATCC prior to September 24, 1999 a vector containing a cDNA having the nucleic acid of present SEQ ID NO:59 (ATCC Accession No. 209990 deposited on June 16, 1998), wherein that cDNA encodes the polypeptide shown in the present application as SEQ ID NO:60. In this regard, the Examiner is respectfully directed to the enclosed PCT publication at page 498, line 40 which evidences the same.

9. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information or belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful statements may jeopardize the validity of the application or any patent issued thereon.

Signed: William I. Wood
William I. Wood, Ph.D.

Important features:**Signal peptide:**

amino acids 1-20

N-glycosylation site.

amino acids 72-75

Clq domain proteins.

amino acids 144-178, 78-111 and 84-117

Important features:**Transmembrane domains:**

amino acids 12-30 (typeII), 33-52, 69-89 and 93-109

N-myristoylation sites.

amino acids 11-16, 51-56 and 116-121

Aminoacyl-transfer RNA synthetases class-II protein.

amino acids 49-59

Important features:**Signal peptide:**

amino acids 1-29

Transmembrane domain:

amino acids 230-255

N-glycosylation sites.

amino acids 40-43 and 134-137

Tissue factor proteins homology.

amino acids 92-119

Integrins alpha chain protein homology.

amino acids 232-262

Important features:**Signal peptide:**

amino acids 1-27

N-glycosylation sites:

amino acids 4-7, 220-223 and 335-338

Xylose isomerase proteins:

amino acids 191-201
